confident people, better lives, good business..

## MRSA and Infection Control Course

### Designed for

This programme would be suitable whether you are an experienced health care worker caring for clients or patients in a work environment, or are new to the industry. No prior knowledge or experience is essential to take this programme.

### Benefits

Completing a series of tutor marked assignments together with an end of course multi-choice questionnaire, will lead you to the highly acclaimed ASET Certificate in Infection Control.

Candidates who take this programme will develop a greater understanding of the principles of Infection control and will be able to assess risk and control the spread of MRSA.

### Course Content

- Module 1: Infection Control in the Workplace
- Module 2: The Importance of Personal Hygiene in the Control of Infection
- Module 3: Cleaning Processes to Control Infection
- Module 4: Waste Management in the Control of Infection
- Module 5: Some Specific Areas of Infection Control

### Course Information:

Duration: 3 to 4 days - flexible  
Assessment: Written assignment and multi-choice questions  
Prerequisite: None
